                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Alternate kinase (EC 2.7.2.4) II precursor - Bacillus sp. (strain MGA3)
NyAlternate names: lysine-sensitive aspartckinase II
NyAlternate names: lysine-sensitive aspartckinase II
NyContains: aspartckinase II alpha chain; aspartckinase II beta chain
CySpecies: Bacillus sp.

SUZYME REGULATION: FEEDBACK INHIBITION BY LYSINE AND THREONINE.

PATHWAY: FIRST SIEP IN THE COMMON BIOSYNTHEIIC PATHWAY LEADING
FROM ASP TO THE CELL WALL PRECURSOR MESO-DIAMINOPIMELATE, TO LYS,
TO MET, TO ILE AND TO THR.

TO MET, TO ILE AND TO THR.

SUBDINIT: Tetramer consisting of 2 isoforms Alpha (catalytic) and
isoforms Beta (function not known).

                                                                        Comment=2 isoforms, Alpha/Aspartokinase II alpha subunit (shown here) and Beta/Aspartokinase II beta subunit, are produced by alcernative initiation.

SIMILARITY: BELONGS TO THE ASPARTOKINASE FAMILY:
PATHWAY: FIRST STEP IN THE COMMON BIOSYNTHETIC PATHWAY LEADING FROM ASP TO DIAMINOPIMELATE AND LYS, TO MET, TO ILE AND TO THR. SUBUNIT: Tetramer consisting of 2 isoforms Alpha (catalytic) and isoforms Beta (function not known).

ALTERNATIVE PRODUCTS:
Event=Alternative initiation;

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        ,001,
